

RING SIZING INSTRUCTIONS

1) Confirm Paper Size

Ring measurements are very precise. Carefully follow these instructions to obtain an accurate measurement scale.

2) Print Setup

In the "Print" control window ensure that Page Scaling is set to "None" on your print dialog box. (To open the print dialog box, press CTRL+P.)

3) Check Measurement Scale

Once printed check the "measurement scale" with a ruler. It should measure exactly 30mm.

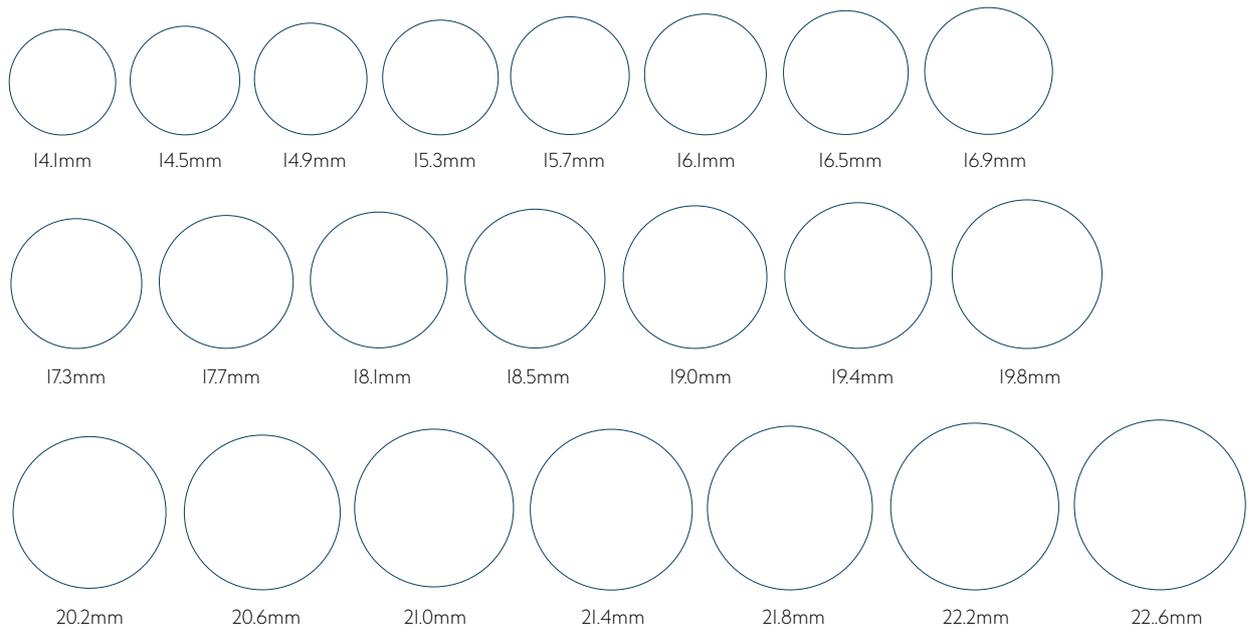

4) Measure Current Ring

Select a ring that properly fits the intended finger. Engagement and wedding rings are traditionally worn on the ring finger on the left hand.

5) Chart Cross check

Place the ring over the circles below, matching the inside edge of the ring to the circle nearest. If the ring falls between two sizes, order the larger size larger size.

RING SIZING CHART

MEASURING YOUR FINGER

Your ring should fit your finger comfortably; snug enough so that it will not fall off, but loose enough to slide over your knuckle. Finger size changes depending on the time of day and the weather. For best results measure your finger size:

1. Measure your fingers at the end of the day and/or when your fingers are warm (In cooler weather fingers are slimmer than when fingers are warm.)
2. Measure finger size 3 to 4 times to eliminate an erroneous reading. Avoid using string or paper to measure ring size as these materials can stretch or twist, yielding an inaccurate measurement.

TIPS FOR BUYING THE RING AS A SURPRISE

Ask your significant other's friends or mother if they know his/her finger size. Borrow one of your significant other's rings (from the correct finger) and use the ring measurements above to determine its size
